## O2OMobile配置文档

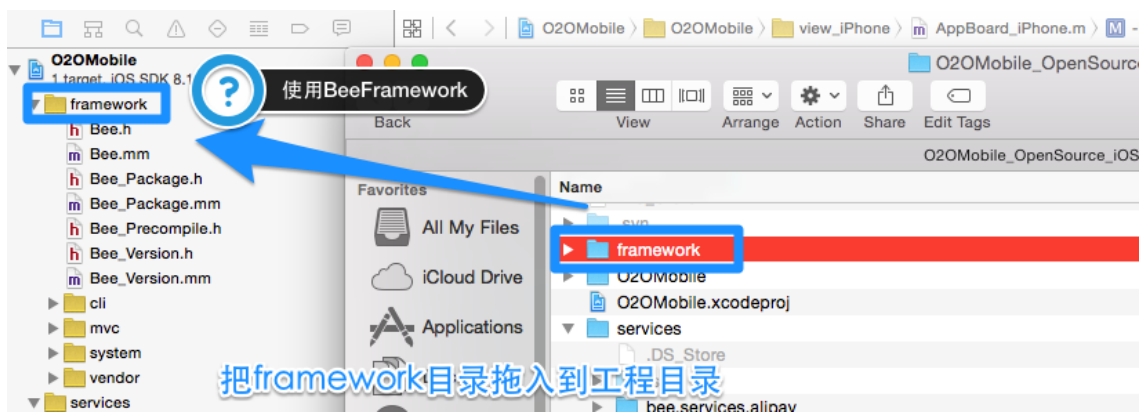

### 项目结构

- framework([BeeFramework](#)框架)
- services(BeeFramework services组件)
  - bee.services.wizard (引导页组件)
  - bee.services.location (地理位置组件)
  - bee.services.share (分享组件)
  - bee.services.share.sinaweibo (新浪微博组件)
  - bee.services.share.tencentOpen (QQ空间组件)
  - bee.services.share.weixin (微信组件)
- O2OMobile
  - AppConfig.h (API URL及环境、分享Key相关配置)
  - AppConfig.m
  - AppDelegate.h
  - AppDelegate.m
  - components
  - controller
    - controller.h
    - controller.m
    - ErrorMsg.h
    - ErrorMsg.m
  - generated (协议生成文件)
    - O2OMobile.h
    - O2OMobile.mm
  - model
    - model.h (model头文件)
    - model.mm
    - UserModel.h
    - UserModel.m (用户model)
    - OrderInfoModel.h
    - OrderInfoModel.m (订单model)
    - .....
  - view\_iPhone
    - AppBoard\_iPhone.h (App根视图)
    - AppBoard\_iPhone.m
    - components (视图组件)
    - resource
      - splash (引导页资源)
      - html (邀请好友html页面)
      - language(语言文件配置)
    - templates ([视图模板](#))
      - A0\_HomeBoard\_iPhone.h
      - A0\_HomeBoard\_iPhone.m
      - A0\_HomeBoard\_iPhone.xml (首页主视图)
      - A0\_ServiceBoard\_iPhone.h
      - A0\_ServiceBoard\_iPhone.m
      - A0\_ServiceBoard\_iPhone.xml (需要帮助视图)
      - A0\_RequestListBoard\_iPhone.h
      - A0\_RequestListBoard\_iPhone.m
      - A0\_RequestListBoard\_iPhone.xml (周边需求视图)
      - .....
  - Supporting Files
  - Images.xcassets(资源图片)

### framework和services的使用

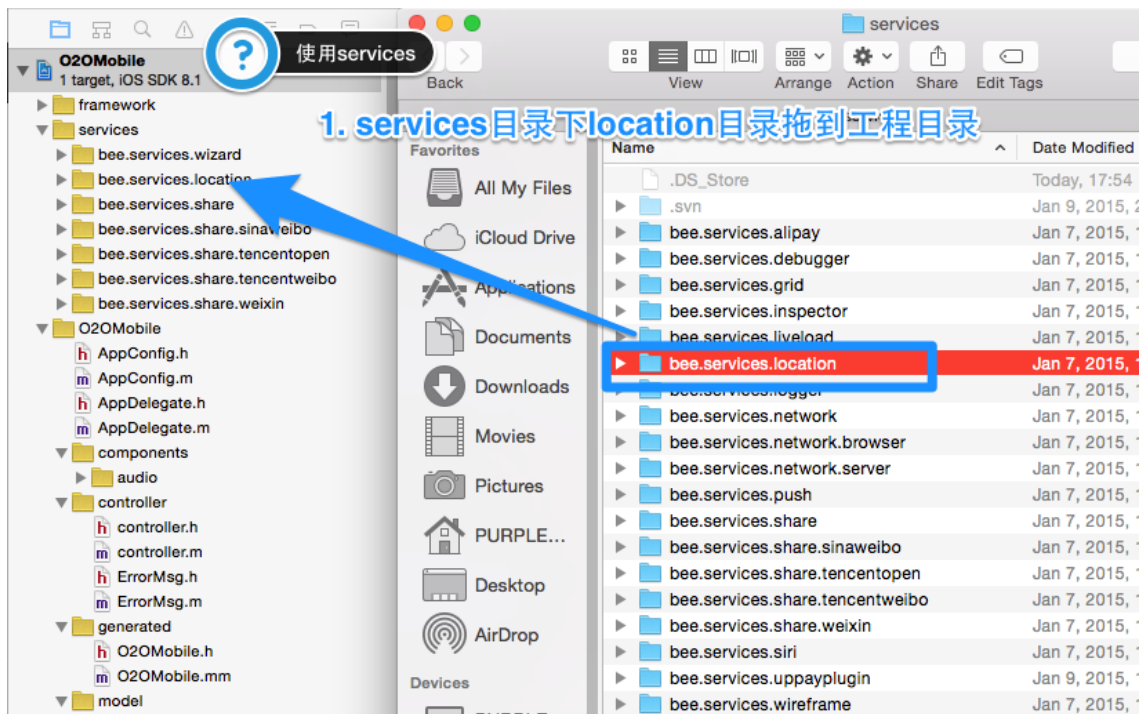

#### BeeFramework

BeeFramework从目录拖入到工程目录

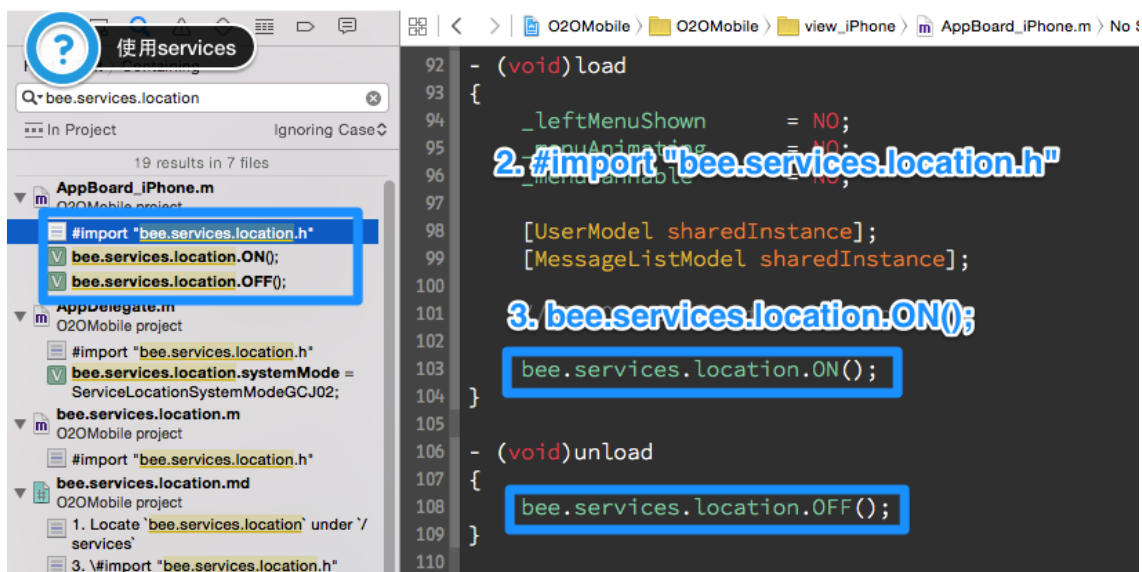

## Services组件

services从目录拖入到工程目录

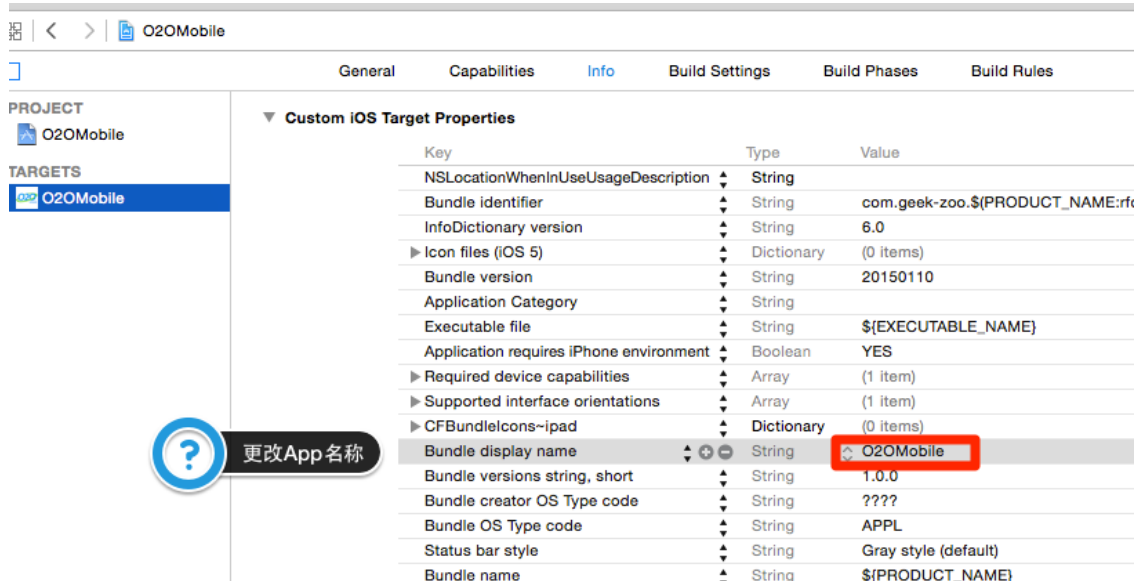

文件中引用、使用service

## 工程文件相关配置

### 编译配置

#### 更改App名称

### 真机调试

真机调试需要开发者账号和创建App IDs,XCode中设置Bundle ID,Code Signing Identity,Provisioning Profile.

- 开发者账号和创建App IDs

Certificates, Identifiers & Profiles

iOS Apps

**Certificates**

- All
- Pending
- Development
- Production

**Identifiers**

- App IDs**
- Pass Type IDs
- Website Push IDs
- iCloud Containers
- App Groups
- Merchant IDs

**Devices**

- All

**Provisioning Profiles**

- All
- Development**
- Distribution

1. 创建证书

2. 创建App ID

3. 创建Provisioning Profiles

Getting Started with iOS Certificates

You will need to set up digital certificates to develop and distribute iOS apps. To install your app on a development device or submit it to the App Store, it must first be signed with an Apple-issued certificate. Certificates allow the system to identify who signed the app.

**Request Certificates with Xcode**

Xcode is the easiest way to request certificates. Connect your device to your Mac and click Use for Development in Xcode's Organizer window. Sign in with the Apple ID associated with your iOS Developer Program membership and Xcode will automatically generate your certificates.

**Request Certificates Manually**

Click the [Certificate Signing Request](#) from your account page.

[Learn More](#)

- 设置Bundle ID

General Capabilities Info Build Settings Build Phases Build Rules

**Identity**

Bundle Identifier com. [redacted]

Version [redacted]

Build [redacted]

Team [redacted]

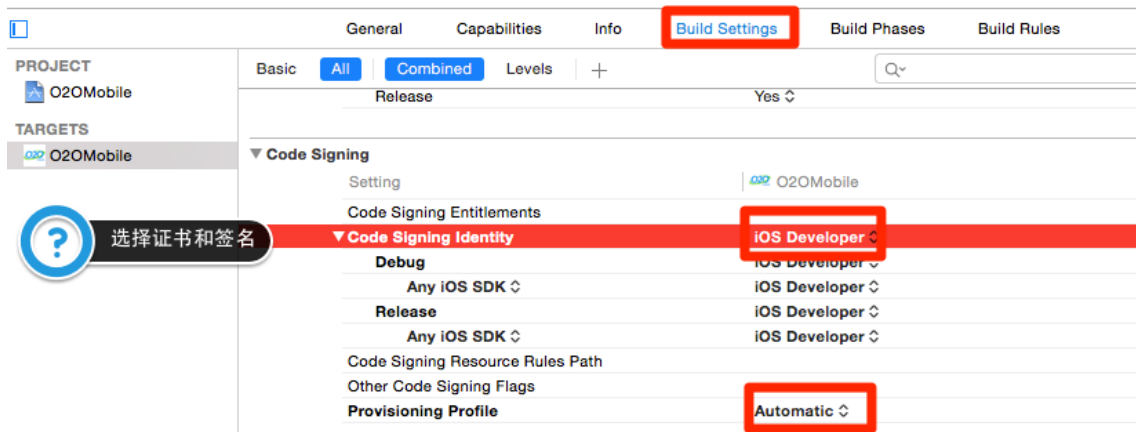

Deployment Info

Deployment Target 6.0

Devices iPhone

Main Interface [redacted]

- 设置Code Signing Identity, Provisioning Profile

## API URL相关配置

### 配置API URL

- AppConfig.h 中更改宏
  - APP\_DEVELOPMENT\_API\_URL (开发环境)
  - APP\_TEST\_API\_URL (测试环境)
  - APP\_PRODUCT\_API\_URL (生产环境)

```
#pragma mark - APP API URL

#undef APP_DEVELOPMENT_API_URL
#define APP_DEVELOPMENT_API_URL @"http://dev.o2omobile.cn"

#undef APP_TEST_API_URL
#define APP_TEST_API_URL @"http://dev.o2omobile.cn"

#undef APP_PRODUCT_API_URL
#define APP_PRODUCT_API_URL @"http://demo.o2omobile.cn"
```

### 配置API 环境

- AppConfig.h 中更改宏
  - APP\_DEVELOPMENT (环境开关, 0: 生产环境, 1: 开发)

```
#pragma mark - APP Environment

#undef APP_DEVELOPMENT
#define APP_DEVELOPMENT (0)
```

## 分享相关配置

- 配置分享相关Key
  - AppConfig.h 中更改宏

```

#pragma mark - Sina weibo

#define SINaweibo_APP_KEY      @"<Your information>" // App Key
#define SINaweibo_APP_SECRET   @"<Your information>" // App Secret
#define SINaweibo_REDIRECT_URI @"<Your information>" // 授权回调页

#pragma mark - Tencent Open

#define TENCENTOPEN_APP_ID     @"<Your information>" // App ID
#define TENCENTOPEN_APP_KEY    @"<Your information>" // App KEY

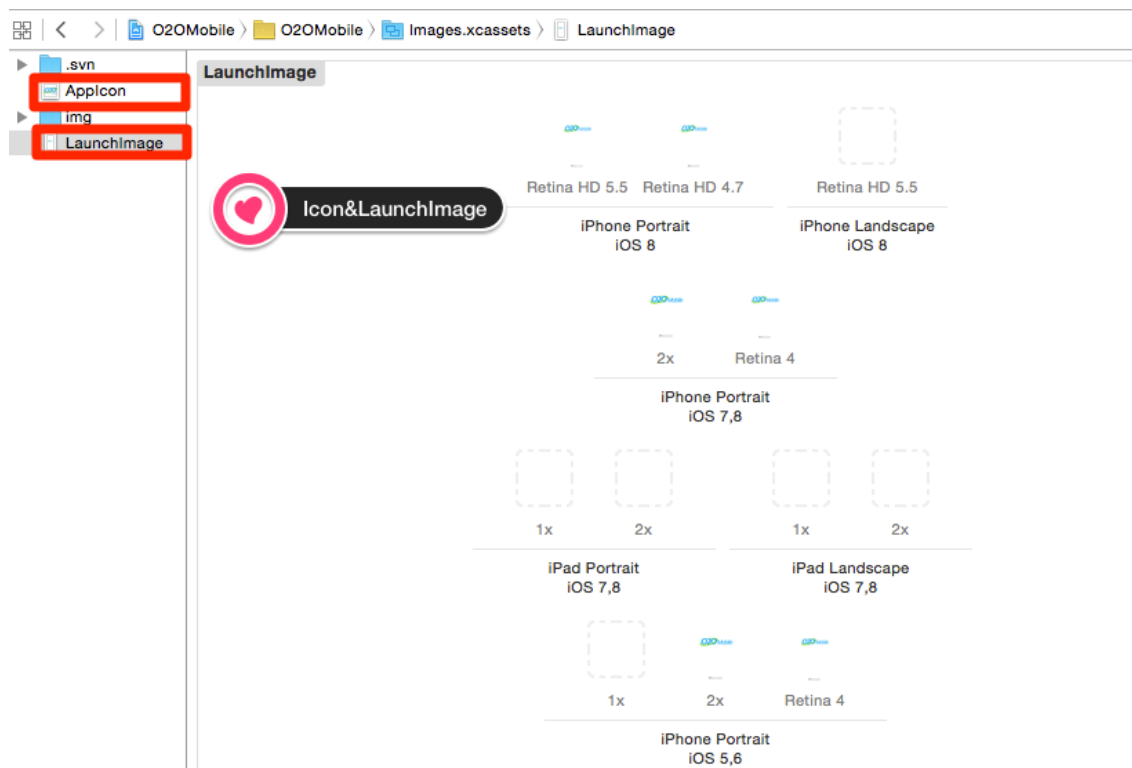

#pragma mark - Weixin

#define WEIXIN_APP_ID          @"<Your information>" // App ID
#define WEIXIN_APP_KEY         @"<Your information>" // App KEY

```

## 更新UI配置

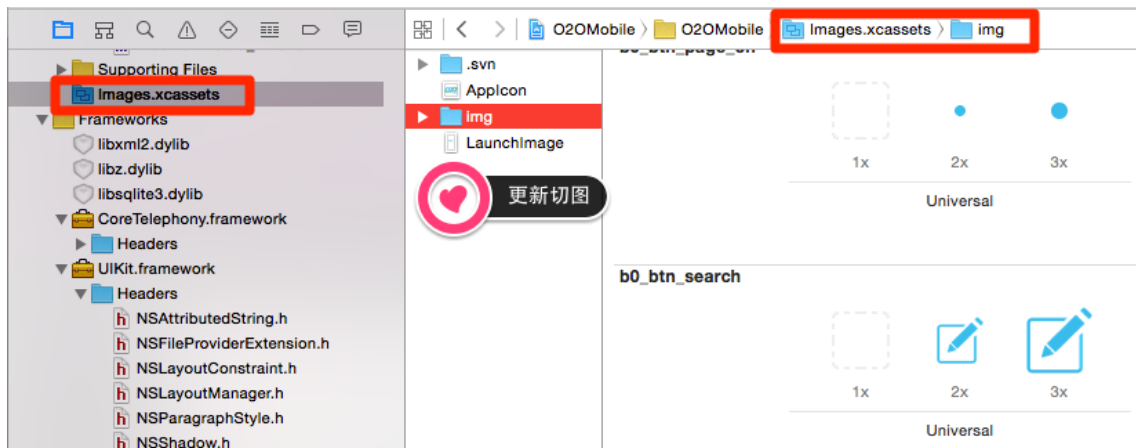

- 更新icon&LaunchImage

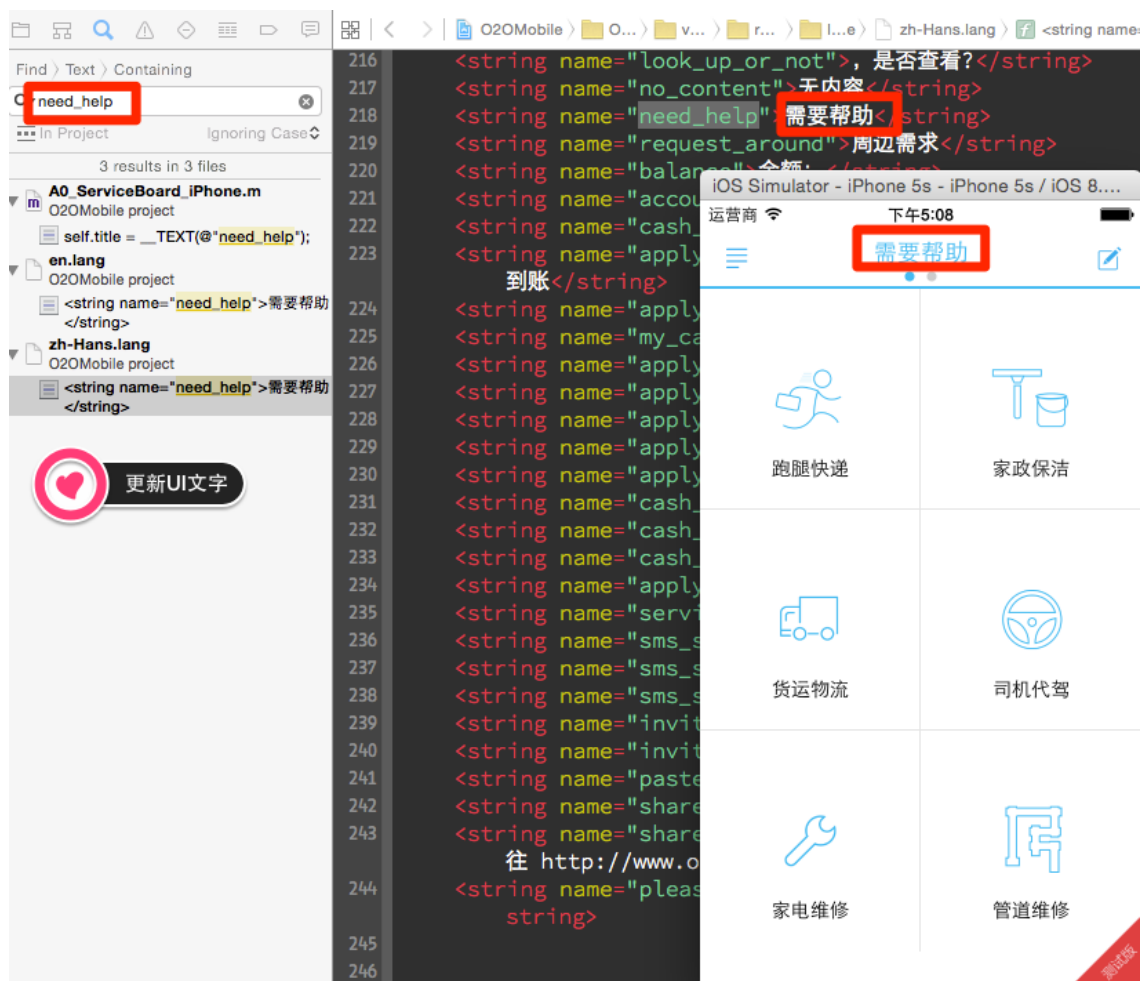

- 更新引导页

- 更新切图

- 更新UI文字显示
